SUMMARY

I am a result-oriented Full-Stack Developer and a current B.Sc. Computer Science candidate. My journey as a self-directed learner in mastering the MERN stack is fueled by my commitment to independent research and practical projects. I am passionate about creating scalable web applications that ensure smooth user experiences

EDUCATION

B.Sc. in Computer Science

Rajkunwar College, Dr. Babasaheb Ambedkar Marathwada University

📅 06/2023 - 06/2026 📍 Chhatrapati Sambhajnagar

PROJECTS

Let's Talk

🔗 <https://letstalk-pk.vercel.app>

Let's Talk – Real-Time Chat Application

- Built a full-stack chat application featuring real-time, bidirectional communication powered by Socket.io
- Implemented a responsive, modern UI using React.js, Tailwind CSS, and DaisyUI
- Managed global application state efficiently using Redux
- Secured user routes and account privacy by implementing JWT-based authentication and authorization
- Structured and stored user data, messages, and chat rooms using MongoDB

VidTube

🔗 <https://vidtube-pk.vercel.app>

VidTube – Video Hosting Platform

- Developed a full-stack video streaming and hosting platform designed to handle complex data operations and seamless video playback
- Built the frontend using React.js, utilizing Zustand for local state management and TanStack Query for efficient server-state management
- Designed a mobile-first, responsive user interface using Tailwind CSS and Shadcn UI components
- Engineered the backend with Node.js and Express.js, implementing secure user authentication and authorization using JSON Web Tokens (JWT)
- Utilized MongoDB for robust data storage and managed media assets via Cloudinary
